

KUCINICH 2008

About Dennis Kucinich

Dennis Kucinich's courageous and visionary presidential campaign excited a new generation of young Americans to involvement in the 2004 Democratic Primary elections. His speech to the 2004 Democratic Convention will long be remembered as a clarion call to purpose in the Democratic Party.

Kucinich's Presidential candidacy was a continuation of his challenge to the war in Iraq. He led 125 Democratic Members of Congress in opposition to the war. His "Prayer for America" speech in Los Angeles in February of 2002 inspired tens of thousands of emails, many urging him to run for President. He insisted early on there was no proof of any "weapons of mass destruction". He toured the country, warning America about the dangers of attacking a nation which did not attack us. Today he is seen as the prophet who predicted hundreds of billions of dollars wasted, countless lives lost, America's credibility in the world severely undermined. Today he insists that the United States must withdraw from Iraq.

Kucinich has advocated the creation of a cabinet-level Department of Peace, to make non-violence an organizing principle within our society. He believes that peace, not war, is inevitable, if we are willing to work for peace. He sees the world as being interconnected and interdependent. This vision always strives to find the commonalities, the points where unity can be formed. He believes the United States can best lead the way through full support of the Nuclear Non Proliferation Treaty, the Kyoto Climate Change Treaty, the Chemical Weapons Convention, the Biological Weapons Convention; joining the International Criminal Court, signing the Landmine Treaty and the Small Arms Treaty. As we rejoin the world in full support of principles of international law, we help build the cause of human unity, he believes. In his fifth term in the United States House, Kucinich has been a leader for Universal Health Care, a full employment economy, fully-paid tuition at public colleges and universities, repeal of the Patriot Act, the development of bio-fuels as alternative energy and

restoration of America's basic manufacturing and infrastructure. He is currently leading an effort to support the role of NASA in the development of basic research for civil aeronautics.

Kucinich first came to national prominence in 1977 when he was elected mayor of Cleveland at age 31; the youngest person ever elected to lead a major American city. In 1978, Cleveland's banks demanded that he sell the city's 70 year-old municipally-owned electric system to its private competitor (in which the banks had a financial interest) as a precondition of extending credit to city government. Kucinich refused to sell Muni Light. In an incident unprecedented in modern American politics, the Cleveland banks plunged the city into default for a mere \$15 million. Kucinich lost his re-election bid in 1979. Fifteen years later, Kucinich made his first step toward a political comeback, winning election to the Ohio Senate on the strength of the expansion of the city's light system which provides low-cost power to almost half the residents of Cleveland. In 1998 the Cleveland City Council honored him for, "having the courage and foresight to refuse to sell the city's municipal electric system."

Kucinich was born in Cleveland, Ohio on October 8, 1946. He is the eldest of 7 children of Frank and Virginia Kucinich. He and his family lived in twenty-one places, including a couple of cars, by the time Kucinich was 17 years old. "I live each day with a grateful heart and a desire to be of service to humanity," he says.

Kucinich has promoted a national health care system, preservation of Social Security, increased Unemployment Insurance benefits, and the establishment of wholesales cost-based rates for electricity, natural gas and home heating oil. When the Supreme Court ruled that mandatory arbitration could be a condition of employment, Kucinich introduced a bill to reverse the Court's decision.

In his Cleveland, Ohio district, Kucinich has been recognized by the Greater Cleveland AFL-CIO as a tireless

advocate for the social and economic interests of his community. He is currently leading a civic crusade to save Cleveland's 90 year-old steel industry and the thousands of jobs and retiree benefits it provides. While hundreds of community hospitals have been closed throughout the country, Kucinich led a powerful citizens' movement which reopened two Cleveland neighborhood hospitals. He was prepared to block a railroad merger at the Surface Transportation Board until he gained an agreement from the nation's largest railroads which improved rail safety while diverting a heavy volume of train traffic away from heavily populated residential areas. His promotion of rail safety improvements gained him the top award from the Ohio PTA in 2000. His efforts on behalf of Cleveland's poor gained the recognition of the National Association of Social Workers. He continues to be a local and national advocate for the homeless.

Congressman Kucinich acts upon his belief that protection of the global environment is fundamental to preserving the life of all species. He has been honored by Public Citizen, the Sierra Club, Friends of the Earth and the League of Conservation Voters as a champion of clean air, clean water and an unspoiled earth. He was an early critic of nuclear power as being risky economically, and environmentally, raising questions about nuclear waste byproducts. As a state senator he raised so many questions about a planned siting of a nuclear waste dump in Ohio that the idea was eventually scrapped. Early in his first term in Congress he thwarted an effort to repeal a provision of the Clean Air Act. As a congressional representative to the global climate treaty talks, Congressman Kucinich encouraged America to lead the way toward a sustainable, shared stewardship of the planet through carbon reduction, and investment in alternative energy technologies.

He not only believes in sustainability, he practices it. Congressman Kucinich is one of the few vegans in Congress, a dietary decision he credits not only with improving his health, but in deepening his belief in the

sacredness of all species. In the 106th Congress, his call for labeling and safety testing of all genetically engineered foods provoked a \$50 million advertising campaign by the biotech industry. Kucinich hosted an international parliamentary session, attended by officials of 18 countries, on the social, economic, political and health impact of genetic food technologies. More recently he was one of the principal speakers at an international conference on water rights, where he called for governments to reserve public ownership of water resources. Kucinich is a dynamic, visionary leader who combines a powerful activism with a spiritual sense of the essential interconnectedness of all living things. His holistic worldview carries with it a passionate commitment to public service, peace, human rights, workers rights, and the environment. His advocacy of a Department of Peace seeks not only to make nonviolence an organizing principle in our society, but to make war archaic. His is a powerful, ethical voice for nuclear disarmament, preservation of the ABM treaty, banning weapons in outer space, and a halt to the development of a 'Star Wars' - type missile defense technology.

He has been recognized for his advocacy of human rights in Burma, Nigeria and East Timor. Together with the late Rep. Joe Moakley (D-Mass), he has led a concerted effort to close the School of the Americas, which has been an incubator of human rights violations in Central America. On the eve of the World Trade Organization's Seattle conference, Rep. Kucinich organized 114 Democrats to help convince President Clinton to seek human rights, workers rights and environmental quality principles as preconditions in all US trade agreements. Kucinich marched with workers through the streets of Seattle protesting the WTO's policies and with students through the streets of Washington, DC, challenging the structural readjustment policies of the IMF.

Dennis Kucinich is the 2003 recipient of the Gandhi Peace Award.
